About Gujarat Paper Tubes

Gujarat Paper Tubes is a second-generation family business, formally incorporated in 2016 by Snehalkumar Vallbhadas Bharakhda in Ahmedabad, Gujarat, building on the family's earlier experience in the paper tube trade. Since incorporation, the company has grown into a Ministry of MSME-registered (Udyam) micro-enterprise manufacturing spiral paper tubes and industrial paper cores for customers across multiple industries.

We are committed to delivering quality, reliability, and value through continuous improvement, technical expertise, and long-term customer partnerships.

Our manufacturing facility in Ahmedabad is equipped with modern production machinery, industrial drying systems, and precision measuring equipment, enabling us to deliver consistent, high-quality paper tube solutions for a wide range of industrial applications.

MILESTONES

- 2016

Gujarat Paper Tubes incorporated and commenced production in Ahmedabad, Gujarat, continuing the family's background in the paper tube trade.
- 2019

Import Export Code (IEC) registered.
- 2021

Registered under the Government of India's Udyam (MSME) scheme as a Micro enterprise.

10+ years

IN BUSINESS SINCE 2016

3300 sq. m

MANUFACTURING FACILITY

200 tonnes

MONTHLY PRODUCTION CAPACITY

1000 kg

MINIMUM ORDER QUANTITY

Why Choose Us

A modern, reliable manufacturing partner built for demanding industrial buyers.

Second-Generation Business

01

Incorporated 2016, building on our family's background in the paper tube trade.

Custom Manufacturing

02

Tubes built to your specification within Inner Diameter 20-350mm, wall 1-18mm.

Bulk Production Capacity

03

200 metric tonnes per month from our 3300 sq. m Ahmedabad facility.

Documented Quality Process

04

Every batch passes raw material inspection, in-process checks, dimensional inspection, and strength testing.

Reliable Delivery

05

Delivery typically takes up to 10 days depending on order specification and quantity.

Export Registered

06

IEC on file, welcoming enquiries from international manufacturers, converters, and distributors.

Manufacturing Process

03

01

Raw Kraft Paper

Kraft paper is sourced and inspected for quality before entering production.

02

Paper Slitting

Paper rolls are precision-slitted into the widths required for each tube specification.

03

Glue Preparation

Adhesive is prepared and dosed to ensure consistent, strong ply bonding.

04

Spiral Winding

Slit paper plies are spiral-wound at controlled tension to form the tube body.

05

Cutting

Continuous tubes are precision cut to the required lengths.

06

Drying

Cut tubes pass through our industrial drying systems to cure the adhesive fully.

07

Quality Inspection

Each batch is checked as part of our documented quality assurance process.

08

Safe Packing

Approved tubes are packed to prevent damage during transit and storage.

09

Timely Delivery

Orders are dispatched to customers across India.

Machinery & Equipment

Our 3300 sq. meter facility in Ahmedabad is equipped with the following production and quality-testing machinery.

MACHINE	FUNCTION	CAPACITY
Spiral Winding Machines	Two complete spiral winding machine sets used to form paper tubes and cores from kraft paper reels.	2 complete sets
Slitting Machines	Used to slit kraft paper reels into the precise widths required for spiral winding.	2 units
Finish Cutters	Cut wound tubes to final length with a clean, precise edge.	2 units
Adhesive Mixing Machine	Prepares the adhesive used to bond paper layers during winding.	1 unit
SC (Crush Strength) Testing Machine	Tests the compression/crush strength of finished tubes as part of our quality process.	1 unit
Moisture Meter	Checks moisture content of paper and finished tubes.	1 unit
Industrial Oven Drier	Cures and dries wound tubes before finishing and dispatch.	Size 20' x 9' x 9'

Quality Assurance

STAGE	WHAT WE CHECK
Raw Material Inspection	Incoming kraft paper is checked against approved specifications before use.
In-Process Quality Checks	Quality is checked throughout the production process, not just at the end.
Final Dimensional Inspection	Inner and outer diameters are verified against tolerance for every production batch.
Strength & Performance Testing	Tubes are tested for strength and performance before approval.
Safe Packing & Timely Delivery	Approved tubes are packed to prevent damage and dispatched on time.

600 CS

STRENGTH ACHIEVEMENT

Achieved on a tube tested at 76mm ID x 10mm wall thickness, demonstrating our production and quality-testing capability.

REGISTRATIONS

MSME (Udyam) Registered

UDYAM REGISTRATION NUMBER UDYAM-GJ-01-0048448 - REGISTERED MICRO ENTERPRISE

01

Spiral Paper Tubes

High-quality spiral-wound kraft paper tubes for general industrial winding and packaging.

Our spiral paper tubes are manufactured at our Ahmedabad facility using modern production machinery, industrial drying systems, and precision measuring equipment. Every batch goes through raw material inspection, in-process quality checks, final dimensional inspection, and strength & performance testing before safe packing and dispatch.

SPECIFICATIONS	
Inner Diameter	20mm - 350mm
Outer Diameter	As per ID + wall thickness
Wall Thickness	1mm - 18mm
Length	1 inch - 20 feet (as per requirement)
Paper GSM	As per application requirement
Weight	Varies by size
Strength	Tested for strength & performance as part of our quality process
Finish	Standard
Moisture Resistance	Available on request
Printing Options	Available on request
Tolerance	Precision manufactured to our standard tolerances

APPLICATIONS

- General industrial winding
- Packaging cores
- Roll winding for films and paper

INDUSTRIES SERVED

Packaging, Paper & Converting, Plastic Film & Stretch Film, Labels & Printing

Industrial Paper Cores

Reliable winding cores for paper, converting, and industrial applications.

Industrial paper cores engineered for consistent inner diameter and dependable performance, keeping converting and winding lines running without interruption.

SPECIFICATIONS	
Inner Diameter	20mm - 350mm
Outer Diameter	As per ID + wall thickness
Wall Thickness	1mm - 18mm
Length	1 inch - 20 feet (as per requirement)
Paper GSM	As per application requirement
Weight	Varies by size
Strength	Tested for strength & performance as part of our quality process
Finish	Standard
Moisture Resistance	Available on request
Printing Options	On request
Tolerance	Precision manufactured to our standard tolerances

APPLICATIONS

- Paper and converting operations
- Label stock winding
- General core winding

INDUSTRIES SERVED

Paper & Converting, Labels & Printing

Textile & Yarn Tubes

Tubes for yarn winding and textile manufacturing applications.

Manufactured within our standard production range for textile and yarn manufacturing groups, one of the core industries we serve.

SPECIFICATIONS

Inner Diameter	20mm - 350mm
Outer Diameter	As per ID + wall thickness
Wall Thickness	1mm - 18mm
Length	1 inch - 20 feet (as per requirement)
Paper GSM	As per application requirement
Weight	Varies by size
Strength	Tested for strength & performance as part of our quality process
Finish	Standard
Moisture Resistance	Available on request
Printing Options	On request
Tolerance	Precision manufactured to our standard tolerances

APPLICATIONS

- Yarn winding
- Textile manufacturing

INDUSTRIES SERVED

Textile & Yarn

Film Cores

Cores for plastic film and stretch film winding.

Manufactured within our standard production range for plastic film and stretch film manufacturers, one of the core industries we serve.

SPECIFICATIONS	
Inner Diameter	20mm - 350mm
Outer Diameter	As per ID + wall thickness
Wall Thickness	1mm - 18mm
Length	1 inch - 20 feet (as per requirement)
Paper GSM	As per application requirement
Weight	Varies by size
Strength	Tested for strength & performance as part of our quality process
Finish	Standard
Moisture Resistance	Available on request
Printing Options	On request
Tolerance	Precision manufactured to our standard tolerances

APPLICATIONS

- Stretch film winding
- Plastic film winding

INDUSTRIES SERVED

Plastic Film & Stretch Film

Packaging Tubes

Tubes for chemical, FMCG, and general packaging use.

Manufactured within our standard production range for chemical, FMCG, dairy, and general packaging applications.

SPECIFICATIONS

Inner Diameter	20mm - 350mm
Outer Diameter	As per ID + wall thickness
Wall Thickness	1mm - 18mm
Length	1 inch - 20 feet (as per requirement)
Paper GSM	As per application requirement
Weight	Varies by size
Strength	Tested for strength & performance as part of our quality process
Finish	Standard
Moisture Resistance	Available on request
Printing Options	On request
Tolerance	Precision manufactured to our standard tolerances

APPLICATIONS

- Chemical packaging
- FMCG and dairy packaging
- General packaging

INDUSTRIES SERVED

Packaging, Hygiene & Nonwoven

Custom Tubes

Custom paper tubes built to your specification, within our production range.

Custom sizes are available on request. Share your requirement and we will manufacture within our production range: Inner Diameter 20mm-350mm, Wall Thickness 1mm-18mm.

SPECIFICATIONS

Inner Diameter	20mm - 350mm (custom within range)
Outer Diameter	As per ID + wall thickness
Wall Thickness	1mm - 18mm (custom within range)
Length	1 inch - 20 feet (as per requirement)
Paper GSM	As per application requirement
Weight	Varies by size
Strength	Tested for strength & performance as part of our quality process
Finish	As per requirement
Moisture Resistance	Available on request
Printing Options	On request
Tolerance	As per drawing/specification

APPLICATIONS

Application-specific winding within our production range

INDUSTRIES SERVED

Textile & Yarn, Plastic Film & Stretch Film, Paper & Converting, Labels & Printing, Packaging, Hygiene & Nonwoven

COMPRESSION STRENGTH TESTING ON A FINISHED TUBE

Industries

08

T

Textile & Yarn

Cores and tubes for yarn winding and textile manufacturing groups.

P

Plastic Film & Stretch Film

Cores for stretch film and plastic film manufacturers.

P

Paper & Converting

Winding cores for paper and paper-converting operations.

L

Labels & Printing

Cores for label stock and printing paper winding.

P

Packaging

Tubes and cores for chemical, FMCG, and general packaging use, including dairy and food-sector packaging.

H

Hygiene & Nonwoven

Cores for hygiene and nonwoven product manufacturing.
